

A description example of a science textbook in the UK

Why study

Why is learning this unit beneficial for students?
(Significance of the learning)

The Science

Content of the science to be learned in this unit

Ideas about Science

Ideas on how scientific interpretation has been developed, and the influence of science and technology on society in the context of learning in this unit.

In the textbook 21st century science (GCSE) Combined Science, not only is the content of the science discussed, but also the significance in having students study the content, and understanding about science.

Prepared on the basis of the materials provided by Associate Professor Susumu Nozoe (University of Miyazaki) at the FY2017 Study Group.
