

Schools for the Future

-How to create spaces for diverse activities
 for children, teachers and staff in schools-

**Wednesday,
 January 29, 2025**

13:30~17:30(JST)

venue : 3F Auditorium, MEXT

Free/ Simultaneous interpretation between Japanese, English and Korean/
 In-person(capacity of 300 people) and simultaneous online delivery

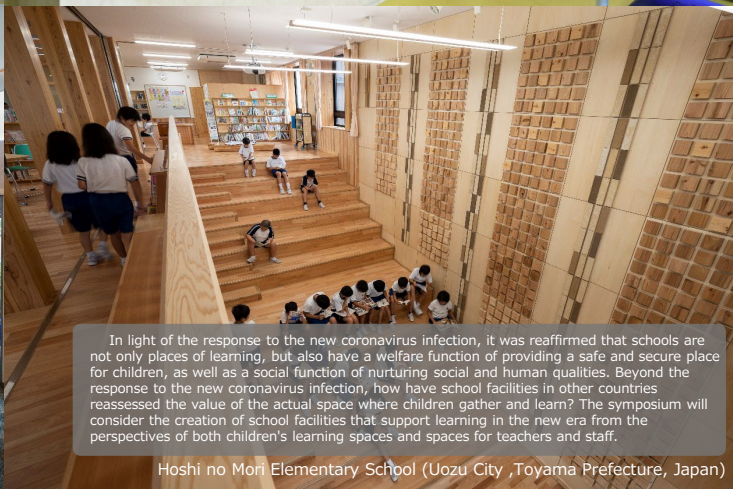

Harcourt Terrace Educate Together School (Dublin, Ireland)

Shinhyeon Elementary School (Seoul, Korea)

Khandallah Primary School (Wellington, New Zealand)

In light of the response to the new coronavirus infection, it was reaffirmed that schools are not only places of learning, but also have a welfare function of providing a safe and secure place for children, as well as a social function of nurturing social and human qualities. Beyond the response to the new coronavirus infection, how have school facilities in other countries reassessed the value of the actual space where children gather and learn? The symposium will consider the creation of school facilities that support learning in the new era from the perspectives of both children's learning spaces and spaces for teachers and staff.

Hoshi no Mori Elementary School (Uozu City ,Toyama Prefecture, Japan)
